OPENSTEP

Welcome to the world of Objects. Using OPENSTEP's advanced object technology, you can develop powerful, easy-to-use, client/server business applications very rapidly, and easily integrate them with your productivity and legacy software. We're committed to continuously improving our products based on our customers' feedback, so please send your suggestions to our product improvement electronic mailbox (**product_suggestions@next.com**). We hope you love OPENSTEP as much as we do.
